Theory Under Construction and Testing — Revised Edition

Table of Contents

Section I: The Quranic Foundation — The Original Theory

Chapter 1: The Seven Principles

Chapter 2: The Core Equation — Differential Acceleration

Chapter 3: Numerical Calculations — Escape Velocity 10.6 km/s

Chapter 4: The Vacuum Tube — A Submarine in an Ocean of Air

Chapter 5: The Magnet as Concentrator — Maurer's Experiment

Chapter 6: Boundaries of the Medium — Light Upon Light

Chapter 7: The Moon — Weight of a Feather (7 Proofs)

Proposed Experiment Protocol

Conclusion

Section I: The Quranic Foundation

The Quranic verses presented here are not retrospective citations supporting a physical idea — they are the **original theoretical source** upon which this theory is built. The physics serves as experimental verification of what the Quran stated 1,400 years ago.

Theory 1 — The Sky is the Cause of Weight

وَالسَّمَاءَ رَفَعَهَا وَوَضَعَ الْمِيزَانَ

"And the sky He raised, and He set the Balance"

Ar-Rahman 7

Raising the sky (creating the atmosphere) is the **direct cause** of establishing weight. The sequence is causal: first the sky was raised → then weight was established. The verse did NOT say "He created the Earth and set the Balance" — it linked weight exclusively to the sky. **Where there is no sky — there is no Balance whatsoever.**

Theory 2 — Light Upon Light: The Repeating Model

مَثَلُ نُورِهِ كَمِشْكَاةٍ فِيهَا مِصْبَاحٌ ٱلْمِصْبَاحُ فِى زُجَاجَةٍ ... نُّورٌ عَلَىٰ نُورٍ

"The parable of His Light is a niche containing a lamp, the lamp in a glass... Light upon Light"

An-Nur 35

This verse describes not one layer but a **repeating engineering model** for every atmospheric layer:

Verse Element	Function	In Each Layer
Niche (Mishkat)	Containing frame	Layer boundaries
Lamp (Misbah)	Active energy source	What radiates in that layer

Glass (Zujaja)	Transparent distributor	What distributes energy
Blessed Tree	Fuel/charging source	What feeds that layer
"Its oil nearly glows"	Self-charging	Each layer is charged enough to nearly glow on its own

Layer	Niche	Lamp	Glass	Tree	"Nearly glows"
Troposphere	0–12 km	Trapped heat	Water vapor	Sun + Earth core	Twilight after sunset
Stratosphere	12–50 km	Ozone	UV absorption	UV radiation	Ozone glow
Thermosphere	85–600 km	Ionization	Ionized gas	Solar wind	Airglow at night
Magnetosphere	1,000–65,000 km	Van Allen belts	Field lines	Sun + core spin	Aurora

Theory 3 — Iron Was "Sent Down" = Origin of the Balance

وَأَنزَلْنَا الْحَدِيدَ فِيهِ بَأْسٌ شَدِيدٌ وَمَنَافِعُ لِلنَّاسِ

"And We sent down iron, in which is mighty power and benefits for people"

Al-Hadid 25

Iron was **"sent down"** — not created within the Earth. The Earth, even if it burned for billions of light-years, does not possess the temperature needed to form iron — it requires a supernova explosion at billions of degrees. Iron is not part of Earth's original composition — it was integrated from outside.

Causal chain: Iron sent down → entered Earth's core → molten core spins → generates magnetic field → field protects atmosphere → atmosphere = charged medium → medium creates the Balance (weight). **Iron = the origin of the Balance.**

Chapter 2: The Core Equation

Differential Acceleration

$a = (1 - \rho_{medium} / \rho_{body}) \times \Psi$

Phenomenon	Cause
Iron falls faster than a feather in air	Density difference with the medium
They fall equally in vacuum	$\rho_{medium} = 0 \rightarrow$ factor = 1 for all
Helium balloon floats	$\rho_{helium} < \rho_{air} \rightarrow$ factor is negative

Ψ — The Medium Driver — Independent of g

From pressure gradient: $\Psi = \Delta P / (\rho \times \Delta h) = 9.76\ m/s^2$
From thermodynamics: $\Psi = RT / (MH) = 9.71\ m/s^2$
From Newton: $g = GM/R^2 = 9.82\ m/s^2$

Same number — but the first two methods need neither G nor Earth's mass

Unifying Weight and Buoyancy

$W = m \times \Psi - V \times \rho_m \times \Psi$
Push Buoyancy (Archimedes)

One equation unifies weight and Archimedes: Weight = Push − Buoyancy.

Chapter 3: Numerical Calculations

Escape Velocity: From 408 m/s to 10.6 km/s

Extending the medium boundary from 100 km (gas) to 65,000 km (magnetosphere):

$$
\begin{aligned}
v &= \sqrt{2 \times (E_{gas} + E_{magnetic})} \\
&= \sqrt{2 \times (166{,}600 + 56{,}000{,}000)} \\
&\approx 10{,}600 \text{ m/s} \approx 10.6 \text{ km/s}
\end{aligned}
$$

10.6 km/s vs. 11.2 km/s conventional — only 5% difference!

⚠ **Critical Note:** The mathematical formula is identical to Newton's integral. What differs is the interpretation and the upper limit (65,000 km vs. ∞) — a testable predictive difference.

Orbital Acceleration Follows Electromagnetism

At 408 km altitude	Ratio to surface
Gas density	10^{-21} (vanished)
Magnetic field	**0.83 (still strong)**
Measured acceleration	**0.884 (still strong)**

Acceleration follows the magnetic field — not the gas — and scales as $1/r^2$ (electromagnetic law).

Chapter 4: The Vacuum Tube — A Submarine

A submarine at 1,000 m depth — its walls protect from water entry, but external pressure transfers through the structure. Objects inside **still fall** despite the pressure being on the walls, not on them directly.

Same logic for the vacuum tube: What was evacuated = gas only. What remains = magnetic field (penetrates glass and aluminum completely) + pressure transferred through walls + electromagnetic radiation.

What vanished: the difference between objects. What persisted: "falling" itself.

Chapter 5: The Magnet as Concentrator

A magnet does not create a field — it concentrates the existing field. Like a lens concentrates existing light. Like an amplifier amplifies existing sound.

Maurer's Experiment — 95% from Earth's Field

Measurement	Value
Metal magnetism inside zero-gauss chamber	0.1 A/cm
Same metal in Earth's field	2.1 A/cm
Earth's field contribution	**95%**

The permanent magnet's energy source: The external global field sustains electron alignment. Above the Curie temperature, thermal energy overcomes external support → magnetism is lost. This proves alignment is **externally maintained**, not self-sustaining.

Chapter 6: Boundaries — Light Upon Light

The medium does not end at 100 km — it transforms: gas → plasma → magnetic. The true boundary = **65,000 km** (magnetosphere).

"Gravity" energy needed = 4.29×10^{23} J. Total system energy ≈ 10^{31} J. Ratio = **four parts per million**. No mysterious fourth force needed.

Chapter 7: The Moon — Weight of a Feather

The Moon has no raised sky — therefore no Balance. The theory's sole prediction: **an astronaut's weight on the Moon = weight of a feather.**

Refutation of the ρ×T = 1/5.6 Alternative

❌ **Refuted: The 300-degree evidence:** Lunar surface temperature: +127°C (day) to −173°C (night). A 300°C swing! If the core (1,600 K) reached the surface, it would prevent this extremity. Earth's day-night difference is only ~15°C — because the charged medium retains heat. The Moon has no medium — so the core is trapped inside.

❌ **Refuted: The Quranic evidence:** "He raised the sky and set the Balance" — where there is no sky, there is **no Balance**. Not "weak balance" — NO balance. The verse is absolute.

Seven Proofs

Proof 1 — From the Equation

On the Moon: ρ_medium = 0 (no atmosphere). Ψ_gas = 0 (by definition). Only Ψ_magnetic remains: B_moon/B_earth = 0.1/50 ≈ 1/500. Weight of astronaut (152 kg with suit): ≈ **3 N = 304 grams**

Proof 2 — Impossibility of Adaptation

Minimum biological push force ≈ 50 N. At 3 N weight: 50 is 17× the weight — every movement launches the astronaut. Apollo astronauts **never adapted** throughout their missions. If weight were 26 kg-force (1/6 = a suitcase), they would have adapted in minutes like any child carrying a bag.

Proof 3 — The 82 kg Suit

The suit weighs more than the astronaut! Fighter pilot suits (20 km altitude, full pressure, oxygen) weigh only 15 kg. The extra 67 kg = **the inertia preventing the astronaut from flying away**.

Proof 4 — Zero Friction

Friction = 0.5 × 3 N = **1.5 N**. Any horizontal force above 1.5 N causes sliding — even moving an arm. Apollo footage shows constant slipping and falling at strange angles.

Proof 5 — The Breeze Comparison

Force of a gentle breeze (3 m/s) on a human body = 3.3 N. Astronaut's weight on Moon = 3 N. **Your weight on the Moon = a gentle breeze.**

Proof 6 — Jump Test

At 1/6: lightest step (50 N) < weight (246 N) → cannot leave the ground. At feather-weight: lightest step (50 N) >> weight (3 N) → flies 2.4 m for 31 seconds!

Proof 7 — Quranic

"He raised the sky and set the Balance." The Moon: **no sky → no Balance**. Not "weak" — **none**. The verse admits no gradation.

The Decisive Experiment

🔬 **Proposed Experiment:**

Spring scale + pendulum on the lunar surface:

Measurement	1/6 prediction	Feather prediction
Weight of 1 kg	1.62 N	< 0.02 N
Pendulum period (1 m)	4.93 s	> 60 s

If pendulum period >> 5 seconds — the theory prevails.

Proposed Experiment Protocol

🔬 **Proposed Experiment:**

1 — Density Pendulum (executable immediately)

Wooden bob vs. iron bob, same volume, same string. **Prediction:** wooden bob 0.1% slower.

🔬 **Proposed Experiment:**

2 — Weight Difference by Density

1 kg iron vs. 1 kg wood on a precision scale — in air then in vacuum. **Prediction:** 0.2% difference in air — equal in vacuum.

🔬 **Proposed Experiment:**

3 — Magnet in Zero-Gauss Chamber

Neodymium magnet attraction force inside vs. outside. **Prediction:** measurable loss of force inside.

🔬 **Proposed Experiment:**

4 — Magnetization in Zero Field

Magnetize iron with a coil inside zero-gauss chamber. **Prediction:** much weaker remnant magnetism.

🔬 **Proposed Experiment:**

5 — Pendulum + Scale on the Moon (decisive test)

Prediction: pendulum period (1 m) >> 5 seconds → theory prevails.

Conclusion

وَالسَّمَاءَ رَفَعَهَا وَوَضَعَ الْمِيزَانَ

"And the sky He raised, and He set the Balance"

Ar-Rahman 7

Air is not a secondary correction — it is a fundamental part of the phenomenon. The Quran laid out the complete theory 1,400 years ago:

The sky was raised and the Balance was set. Light upon light — layered mediums, each with its own niche, lamp, glass, and tree. The sky of interwoven paths — a woven field. The sky that returns — force from above, not below. And iron was sent down — because it is not part of Earth's composition — to create the core that creates the field that creates the medium that creates the Balance.

Where there is no sky — there is no Balance. The Moon is the witness. And the astronaut upon it is a feather.

"The handiwork of God, who has perfected everything" — An-Naml 88

Surah Al-Mulk — The Divine Research Program

From Electromagnetic Observation to a Self-Correcting Defense System

Companion Chapter to Fadhil's Charged Medium Theory

الَّذِي خَلَقَ سَبْعَ سَمَاوَاتٍ طِبَاقًا مَّا تَرَىٰ فِي خَلْقِ الرَّحْمَٰنِ مِن تَفَاوُتٍ فَارْجِعِ الْبَصَرَ هَلْ تَرَىٰ مِن فُطُورٍ ﴿٣﴾

"He who created seven heavens in layers. You see no inconsistency in the creation of the Most Merciful. So return your vision — do you see any breaks?"

Surah Al-Mulk (67), verses 3–5

Eng. Fadhil Abbas Abdulhasan Al-Jaafari — Wasit, Iraq

March 2026

Section 1 — Structure: Seven Heavens in Layers

The verse establishes the architecture: seven layers governed by a single law — "you see no inconsistency" = the Charged Medium governs all layers uniformly.

#	Layer	Altitude	Function	In An-Nur 35 Model
1	Troposphere	0–12 km	Weather & life	Niche: heat + water
2	Stratosphere	12–50 km	Ozone shield	Lamp: glowing ozone
3	Mesosphere	50–85 km	Burns incoming objects	Glass: energy distribution
4	Thermosphere	85–600 km	Plasma — gateway	Tree: solar wind charges
5	Exosphere	600–10,000 km	Transition to space	"Oil nearly glows": airglow
6	Van Allen Belts	1,000–60,000 km	Particle & radiation trap	"Brilliant star": aurora
7	Magnetosphere	Up to 65,000 km	Final shield	"Light upon light"

Section 2 — Observation: "Return Your Vision"

"You see" vs. "Vision" — Two Different Functions

The Engineering Equivalents

Arabic Word	Meaning	Engineering Equivalent	In the System
"tarā" (you see)	Seeing — viewing	Display / HMI	What appears on screen
"al-baṣar" (vision)	Deep comprehension	Controller	Data processing & results

Vision is not the wave. The wave is sent and gone. Vision = the results and calculations that return to you after processing what was received. The eye sends nothing — it receives light and builds an image. "Return your vision" = rebuild your results — recalculate.

"Return your vision" — Not a Question but a Directive

"Do you see any breaks?" is not asking — it is **informing**: you will reach the seven layers, you will search them, you will try to find gaps. This is a **research program** laid out 1,400 years ago:

> Step 1: Identify structure → "seven heavens in layers"
> Step 2: Confirm law unity → "you see no inconsistency"
> Step 3: Launch observation cycle → "return your vision"
> Step 4: Search for fuṭūr → "do you see any breaks?"
> Step 5: Repeat with enhanced method → "return vision twice"
> Step 6: Analyze results → "humbled and exhausted"
> Step 7: Understand the medium is charged → "lamps" = An-Nur!
> Step 8: Apply to defense → "projectiles against devils"

Section 3 — "Fuṭūr": Three Simultaneous Meanings

The Arabic root "f-ṭ-r" carries two inseparable meanings: **splitting/cracking** AND **originating/creating** ("Fāṭir" = Creator who originates). "Fuṭūr" = plural = cracks from which new things are born.

1 **Structural meaning:** Do you see cracks/gaps in the layers?

Answer: No — layers are seamlessly continuous.

2 **Electromagnetic meaning:** Do you see Band Gaps? Any frequency that penetrates ALL layers without loss?

Answer: No — each layer has a critical frequency. No single frequency passes through everything.

3 **Dynamic meaning — Births:** Do you see new births between each reading?

Answer: Yes! The atmosphere is a non-stop factory of particle creation:

Layer	Born Every Moment	Dies Every Moment
Upper (>50 km)	Pions + muons + electron/positron pairs	Unstable particle decay
Ionosphere	Ions + free electrons (daytime)	Ion-electron recombination (night)
Stratosphere	New O_3 ozone molecules	Ozone photodissociation
Troposphere	Cloud droplets + rain + NO_2 from lightning	Evaporation + decomposition

Billions of births and deaths every second — yet "you see no inconsistency"! The cycle is oscillatory (birth ↔ death), not cumulative — oscillation around equilibrium.

Section 4 — "Twice": The Enhanced Counter-Attack

ثُمَّ رَدَدْنَا لَكُمُ الْكَرَّةَ عَلَيْهِمْ

"Then We returned to you the counter-attack against them"

Al-Isra' 6

"Karratain" (twice) uses the word "karra" — which in the Quran means a **renewed assault after a setback, with a different strategy** built on analyzing why the first attempt failed. Not mere repetition — but **iterative improvement**.

```
First reading (return your vision):
  Send wave → receive → process results
  Results: no obvious cracks, but overwhelming unexplained data

The Karra (return twice):
  Change frequency / angle / methodology entirely
  Like a smart attacker: never repeats the same plan

Result: "vision returns humbled and exhausted"
  = Even with a new methodology, results are still overwhelming
  = Because the system is flawless from every angle
```

Section 5 — "Humbled and Exhausted": The Expected Correct State

Vision Returns — Not the Wave

What returns is **al-baṣar** (results/understanding) — not the wave. The wave went and is gone. What returns is your **comprehension** after processing received data.

"Khāsi'" (Humbled) = Results Return Disappointing

The results return defeated — because you see the births (fuṭūr, meaning 3) **without the ability to connect or correct them**. Like seeing symptoms without understanding the disease. Disappointing because the researcher attempts to understand the system **without the correct theory** (the Charged Medium).

"Ḥasīr" (Exhausted) = The Grief of Discovery

The results reveal staggering complexity — continuous births with no apparent pattern — and the researcher grieves because he sees the magnitude but lacks the theory that connects everything.

The Reversal: "Humbled + Exhausted" = The CORRECT State!

If vision returns NOT humbled = the medium is dead, unreactive = real fuṭūr!
If vision returns NOT exhausted = layers don't generate or absorb = real fuṭūr!

"Humbled + Exhausted" = system is alive — oscillating — birthing and dying — balanced.
"NOT humbled + NOT exhausted" = system is broken — real alarm!

In SCADA systems: a reading that doesn't change between two polling cycles = dead sensor! Natural oscillation is proof of health, not malfunction. "Humbled and exhausted" = **proof the system is working**.

Section 6 — "Lamps": The Solution in the Next Verse

وَلَقَدْ زَيَّنَّا السَّمَاءَ الدُّنْيَا بِمَصَابِيحَ وَجَعَلْنَاهَا رُجُومًا لِّلشَّيَاطِينِ

"And We adorned the nearest heaven with lamps and made them projectiles against the devils"

Al-Mulk 5

Verse 5 comes **immediately after** the description of failure — and it IS the solution:

```
Verses 3–4 = The Problem:
  Searched for fuṭūr (cracks) → found none
  Repeated with different method → results still overwhelming
  Because you search for cracks while reality is continuous births

Verse 5 = The Solution:
  "We adorned the nearest heaven with lamps"
    → The sky is luminous = charged = the Charged Medium!
    → Direct link to An-Nur 35: "like a niche containing a lamp"
    → Same word: miṣbāḥ → maṣābīḥ

  Al-Mulk points → An-Nur details:
  Every layer = niche + lamp + glass + tree
  = Every layer is charged = the Charged Medium in all its layers
```

The researcher who understands the sky is "lamps" (charged medium) understands the births and oscillations — and vision no longer returns humbled.

Section 7 — "Projectiles Against Devils": The Self-Correcting Defense System

وَأَنَّا لَمَسْنَا السَّمَاءَ فَوَجَدْنَاهَا مُلِئَتْ حَرَسًا شَدِيدًا وَشُهُبًا ﴿٨﴾ فَمَن يَسْتَمِعِ الْآنَ يَجِدْ لَهُ شِهَابًا رَّصَدًا ﴿٩﴾

"We touched the sky and found it filled with stern guards and flaming projectiles. Whoever listens now finds a tracking flame aimed at him."

Al-Jinn 8–9

The Principle: The Charged Medium = Natural Detection System

The Charged Medium is filled with ambient electromagnetic signals (the "lamps"). Any object passing through it — no matter how stealthy — **creates a disturbance in the medium**. The disturbance is detectable. This is exactly the principle of **Passive Radar** that the world is trying to build today.

The Fundamental Difference

	Conventional Radar	Charged Medium System
Principle	Send wave → receive return	Send nothing → detect disturbance in existing signals
Detection	Asks "are you there?"	Feels the disturbance automatically
vs. Stealth	Stealth answers "no" → no detection	Stealth cannot erase its wake → detected
Jamming	Easily jammed	Cannot be jammed — no transmitter to disable
Quran	—	"Stern guards" = silent surveillance

"Devils" = Anyone Who Breaches the System

Arabic "shayṭān" derives from "shaṭana" = to deviate/rebel. "Projectiles against devils" = directed projectiles against any intruder that disturbs the balance. The invisible enemy — **stealth aircraft** or any concealed threat — is precisely the "devil" here: **certain it exists because it is undetected**.

"God Defends Those Who Believe" — He Teaches Defense

God does not defend with magic — He **teaches** believers how to defend themselves. "And prepare against them whatever you are able of power" (Al-Anfal 60) = design and build with maximum technology. The verses draw the **system specifications**.

Engineering Design — Five Layers

Layer 1 — Passive Detection: "Stern Guards"

Distributed receiver network — NO transmitters. Exploits ambient signals already present: FM radio + TV broadcast + GSM towers + WiFi + satellite signals. Any object passing through creates a "shadow" or deflection in these signals. AI processing detects the disturbance.

Quranic principle: "Stern guards" = silent surveillance. Does not transmit — cannot be detected — cannot be jammed — but sees everything.

Layer 2 — Enhanced Verification: "Twice"

First reading: suspected disturbance. The Karra: second scan with different frequency/angle/ambient source — to confirm. Not repetition but a **new attack plan** built on prior failure. If confirmed → proceed to Layer 3.

Quranic principle: "Return vision twice" = never repeat the same method — innovate.

Layer 3 — Identification: "Vision" (Deep Comprehension)

Analyze disturbance pattern: shadow size — speed — altitude — distortion shape. Compare against database: civilian aircraft? Bird? Storm? Or stealth threat? Vision = results = comprehending the identity of the disturbance.

Quranic principle: "Do you see fuṭūr?" = Is the disturbance a natural birth or an intrusion?

Layer 4 — Decision: Humbled or Fuṭūr?

If disturbance is within natural oscillation (civilian / cloud / bird) = **normal humbled** — system operating. If disturbance is unexplained (zero radar cross-section / illogical path / signal absence where signal should exist) = **real fuṭūr** = threat = alarm.

Quranic principle: "Humbled" = natural. "Fuṭūr" (unnatural birth) = threat.

Layer 5 — Response: "Projectiles"

Directed launch with **self-correction**. The projectile does not track the object (it's stealth) — it **tracks the disturbance** in the medium. "A tracking flame" (shahāban raṣadan) = a projectile that tracks. It follows the target's shadow, not the target itself. No conventional "radar lock" needed — it locks onto the disturbance.

Quranic principle: "We made them projectiles" = automatic response. "Tracking flame" = the projectile observes and follows.

Section 8 — Numerical Encoding

Surah Al-Mulk = number 67
  67 = Atomic number of Holmium (Ho)
  = Element with HIGHEST magnetic moment per atom!
  = In a surah describing the magnetic structure of the heavens!

Verses: 3, 4, 5
  Sum: 3 + 4 + 5 = 12
  67 − 12 = 55 = Surah Ar-Rahman!
    (Which contains "He raised the sky and set the Balance")

  Product: 3 × 4 × 5 = 60
    = Base of the sexagesimal system (angles & time measurement)

Section 9 — The Ifrit's Speed and the Tracking Flame

قَالَ عِفْرِيتٌ مِّنَ الْجِنِّ أَنَا آتِيكَ بِهِ قَبْلَ أَن تَقُومَ مِن مَّقَامِكَ ﴿٣٩﴾

"An Ifrit of the Jinn said: I will bring it to you before you rise from your place"

An-Naml 39–40

Entity	Time Reference	Distance (Ma'rib → Jerusalem)	Speed	% of Light
Queen's caravan	≈ 90 days	2,400 km (land)	1.1 km/h	—
The Ifrit	≈ 4 seconds	2,100 km (air)	**525 km/s**	0.175%
The one with knowledge	≈ 0.3 seconds	2,100 km	**7,000 km/s**	2.3%
Sprites	Instant	Local	30,000 km/s	10%
ELVES	Instant	400 km diameter	**300,000 km/s**	**100%**

ELVES = "tracking flame" — the only phenomenon that propagates at light speed. 571× faster than the Ifrit — capable of tracking and intercepting.

Conclusion — From Theory to Application

Verses 3–5 of Surah Al-Mulk are not contemplative descriptions — they are **engineering specifications** for a detection, control, and defense system:

① Structure: Seven heavens in layers = 7 layers, one law (Charged Medium)
② Law unity: No inconsistency = single Ψ governs all
③ Observation cycle: Return your vision = launch polling cycle
④ Search: Fuṭūr = 3 meanings: cracks + band gaps + births
⑤ Enhanced karra: Twice = new method after failure
⑥ Correct result: Humbled + exhausted = system alive and working
⑦ The theory: Lamps = Charged Medium (An-Nur verse)
⑧ Application: Projectiles = self-correcting defense system
— Passive detection (stern guards)
— Projectiles tracking disturbance not object (tracking flame)
— The invisible target revealed by its wake in the medium

إِنَّ اللَّهَ يُدَافِعُ عَنِ الَّذِينَ آمَنُوا

"Indeed, God defends those who believe"

Al-Hajj 38

Defends = teaches defense. The verses = the instructions. The Charged Medium = the ready infrastructure. "And prepare against them whatever you are able of power" = the command to build.

"The handiwork of God, who perfected everything"

An-Naml 88
